# 74VHC164 8-Bit Serial-In, Parallel-Out Shift Register

#### **Features**

- High Speed: f<sub>MAX</sub> = 175MHz at V<sub>CC</sub> = 5V
- Low power dissipation:  $I_{CC} = 4\mu A$  (max.) at  $T_A = 25$ °C
- High noise immunity: V<sub>NIH</sub> = V<sub>NIL</sub> = 28% V<sub>CC</sub> (min.)
- Power down protection provided on all inputs
- Low noise: V<sub>OLP</sub> = 0.8V (max.)
- Pin and function compatible with 74HC164

### **General Description**

The VHC164 is an advanced high-speed CMOS device fabricated with silicon gate CMOS technology. It achieves the high-speed operation similar to equivalent Bipolar Schottky TTL while maintaining the CMOS low power dissipation. The VHC164 is a high-speed 8-Bit Serial-In/Parallel-Out Shift Register. Serial data is entered through a 2-input AND gate synchronous with the LOW-to-HIGH transition of the clock. The device features an asynchronous Master Reset which clears the register, setting all outputs LOW independent of the clock. An input protection circuit insures that 0V to 7V can be applied to the input pins without regard to the supply voltage. This device can be used to interface 5V to 3V systems and two supply systems such as battery backup. This circuit prevents device destruction due to mismatched supply and input voltages.

# **Ordering Information**

| Order Number | Package<br>Number | Package Description  |
|--------------|-------------------|--|
| 74VHC164M    | M14A              | 14-Lead Small Outline Integrated Circuit (SOIC), JEDEC MS-012, 0.150" Narrow |
| 74VHC164SJ   | M14D              | 14-Lead Small Outline Package (SOP), EIAJ TYPE II, 5.3mm Wide                |
| 74VHC164MTC  | MTC14             | 14-Lead Thin Shrink Small Outline Package (TSSOP), JEDEC MO-153, 4.4mm Wide  |
| 74VHC164N    | N14A              | 14-Lead Plastic Dual-In-Line Package (PDIP), JEDEC MS-001, 0.300" Wide       |

Device also available in Tape and Reel. Specify by appending suffix letter "X" to the ordering number.

## **Functional Description**

The VHC164 is an edge-triggered 8-bit shift register with serial data entry and an output from each of the eight stages. Data is entered serially through one of two inputs (A or B); either of these inputs can be used as an active High Enable for data entry through the other input. An unused input must be tied HIGH.

Each LOW-to-HIGH transition on the Clock (CP) input shifts data one place to the right and enters into  $Q_0$  the logical AND of the two data inputs (A • B) that existed before the rising clock edge. A LOW level on the Master Reset ( $\overline{\text{MR}}$ ) input overrides all other inputs and clears the register asynchronously, forcing all Q outputs LOW.

# **Logic Symbol**

#### **Function Table**

| Operating     | Inputs |   |   | Outputs |                                |  |
|---------------|--------|---|---|---------|--------------------------------|--|
| Mode          | MR     | Α | В | $Q_0$   | Q <sub>1</sub> –Q <sub>7</sub> |  |
| Reset (Clear) | L      | Х | Х | L       | L–L                            |  |
| Shift         | Н      | L | L | L       | Q <sub>0</sub> -Q <sub>6</sub> |  |
|               | Н      | L | Н | L       | Q <sub>0</sub> -Q <sub>6</sub> |  |
|               | Н      | Н | L | L       | Q <sub>0</sub> –Q <sub>6</sub> |  |
|               | Н      | Н | Н | Н       | Q <sub>0</sub> -Q <sub>6</sub> |  |

H = HIGH Voltage Levels

L = LOW Voltage Levels

X = Immaterial

Q = Lower case letters indicate the state of the referenced input or output one setup time prior to the LOW-to-HIGH clock transition.

### **Logic Diagram**

Please note that this diagram is provided only for the understanding of logic operations and should not be used to estimate propagation delays.

# **Absolute Maximum Ratings**

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

| Symbol           | Parameter                                | Rating                          |
|------------------|--|---------------------------------|
| V <sub>CC</sub>  | Supply Voltage                           | -0.5V to +7.0V                  |
| V <sub>IN</sub>  | DC Input Voltage                         | -0.5V to +7.0V                  |
| V <sub>OUT</sub> | DC Output Voltage                        | -0.5V to V <sub>CC</sub> + 0.5V |
| I <sub>IK</sub>  | Input Diode Current                      | –20mA                           |
| I <sub>OK</sub>  | Output Diode Current                     | ±20mA                           |
| I <sub>OUT</sub> | DC Output Current                        | ±25mA                           |
| I <sub>CC</sub>  | DC V <sub>CC</sub> /GND Current          | ±75mA                           |
| T <sub>STG</sub> | Storage Temperature                      | -65°C to +150°C                 |
| T <sub>L</sub>   | Lead Temperature (Soldering, 10 seconds) | 260°C                           |

# Recommended Operating Conditions<sup>(1)</sup>

The Recommended Operating Conditions table defines the conditions for actual device operation. Recommended operating conditions are specified to ensure optimal performance to the datasheet specifications. Fairchild does not recommend exceeding them or designing to absolute maximum ratings.

| Symbol                          | Parameter   | Rating                            |
|---------------------------------|---|-----------------------------------|
| V <sub>CC</sub>                 | Supply Voltage  | 2.0V to 5.5V                      |
| V <sub>IN</sub>                 | Input Voltage   | 0V to +5.5V                       |
| V <sub>OUT</sub>                | Output Voltage  | 0V to V <sub>CC</sub>             |
| T <sub>OPR</sub>                | Operating Temperature   | –40°C to +85°C                    |
| t <sub>r</sub> , t <sub>f</sub> | Input Rise and Fall Time, $V_{CC} = 3.3V \pm 0.3V$ $V_{CC} = 5.0V \pm 0.5V$ | 0ns/V ~ 100ns/V<br>0ns/V ~ 20ns/V |

#### Note:

1. Unused inputs must be held HIGH or LOW. They may not float.

| C <sub>PD</sub>                     | Power Dissipation<br>Capacitance |                     | (3)                            |      | 76      |      |                    |               | pF    |

#### Note:

3. C<sub>PD</sub> is defined as the value of the internal equivalent capacitance which is calculated from the operating current consumption without load. Average operating current can be obtained from the equation: I<sub>CC</sub> (opr.) = C<sub>PD</sub> • V<sub>CC</sub> • f<sub>IN</sub> + I<sub>CC</sub>.

## **Physical Dimensions**

DETAIL A

- A) THIS PACKAGE CONFORMS TO JEDEC MS-012, VARIATION AB, ISSUE C,
- B) ALL DIMENSIONS ARE IN MILLIMETERS.
- C) DIMENSIONS DO NOT INCLUDE MOLD FLASH OR BURRS.
- D) LANDPATTERN STANDARD: SOIC127P600X145-14M
- E) DRAWING CONFORMS TO ASME Y14.5M-1994
- F) DRAWING FILE NAME: M14AREV13

Figure 1. 14-Lead Small Outline Integrated Circuit (SOIC), JEDEC MS-012, 0.150" Narrow

Package drawings are provided as a service to customers considering Fairchild components. Drawings may change in any manner without notice. Please note the revision and/or date on the drawing and contact a Fairchild Semiconductor representative to verify or obtain the most recent revision. Package specifications do not expand the terms of Fairchild's worldwide terms and conditions, specifically the warranty therein, which covers Fairchild products.

Always visit Fairchild Semiconductor's online packaging area for the most recent package drawings: http://www.fairchildsemi.com/packaging/

### Physical Dimensions (Continued)

LAND PATTERN RECOMMENDATION

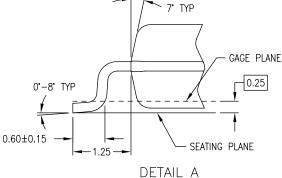

DIMENSIONS ARE IN MILLIMETERS

#### NOTES:

- A. CONFORMS TO EIAJ EDR-7320 REGISTRATION, ESTABLISHED IN DECEMBER, 1998.
  B. DIMENSIONS ARE IN MILLIMETERS.
  C. DIMENSIONS ARE EXCLUSIVE OF BURRS, MOLD FLASH, AND TIE BAR EXTRUSIONS.

M14DREVC

#### DISCLAIMER

FAIRCHILD SEMICONDUCTOR RESERVES THE RIGHT TO MAKE CHANGES WITHOUT FURTHER NOTICE TO ANY PRODUCTS HEREIN TO IMPROVE RELIABILITY, FUNCTION, OR DESIGN. FAIRCHILD DOES NOT ASSUME ANY LIABILITY ARISING OUT OF THE APPLICATION OR USE OF ANY PRODUCT OR CIRCUIT DESCRIBED HEREIN; NEITHER DOES IT CONVEY ANY LICENSE UNDER ITS PATENT RIGHTS. NOR THE RIGHTS OF OTHERS. THESE SPECIFICATIONS DO NOT EXPAND THE TERMS OF FAIRCHILD'S WORLDWIDE TERMS AND CONDITIONS, SPECIFICALLY THE WARRANTY THEREIN, WHICH COVERS THESE PRODUCTS.

#### LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF FAIRCHILD SEMICONDUCTOR CORPORATION.

- 1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury of the user.
- 2. A critical component in any component of a life support, device, or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

#### **PRODUCT STATUS DEFINITIONS**

#### **Definition of Terms**

| Datasheet Identification | Product Status         | Definition   |
|--------------------------|------------------------|--|
| Advance Information      | Formative or In Design | This datasheet contains the design specifications for product development. Specifications may change in any manner without notice.   |
| Preliminary              | First Production       | This datasheet contains preliminary data; supplementary data will be published at a later date. Fairchild Semiconductor reserves the right to make changes at any time without notice to improve design. |
| No Identification Needed | Full Production        | This datasheet contains final specifications. Fairchild Semiconductor reserves the right to make changes at any time without notice to improve the design.   |
| Obsolete                 | Not In Production      | This datasheet contains specifications on a product that has been discontinued by Fairchild Semiconductor. The datasheet is printed for reference information only.                                      |
